Cell Calcium (1998) **24**(6), 435–437
© Harcourt Brace & Co. Ltd 1998

Subject index to Volume 24

A

Activation of heterologously expressed *Drosophila* TRPL channels: Ca^{2+} is not required and $InsP_3$ is not sufficient, 153
Adenoviruses, use of replication deficient, to investigate the role of G proteins in Ca^{2+} signalling in epithelial cells 97
Adrenal (bovine) chromaffin cells, results from two dye two wavelength excitation calcium imaging, 71
Aequorin (targeted), functional measurements of $[Ca^{2+}]$ in the endoplasmic reticulum using a herpes virus to deliver, 87
Alzheimer's disease and calcium dysregulation in neuronal aging: history and new directions (Invited review) 417
Androgen, dual action of, on calcium signaling and luteinizing hormone secretion in pituitary gonadotrophs, 223
Annexin VI binds S100A1 and S100B and blocks the ability of S100A1 and S100B to inhibit desmin and GFAP assemblies into intermediate filaments 177
Apoptosis and cell death in neuronal cells: where does Ca^{2+} fit in? (Invited review), 387
Arachindonic acid , Ca^{2+} entry in CHO cells, after Ca^{2+} stores depletion, is mediated by, 293
ATP and integrin-binding peptide, nuclear and cytosolic calcium changes in osteoclasts stimulated with, 213

B

Biochemical mechanisms of calcium mobilisation induced by mastoparan and chimeric hormone-mastoparan constructs, 27
BTC/AM, a low affinity calcium indicator, neuronal free calcium measurement using, 165

C

Caffeine, subplasmalemmal Ca-stores in *Paramecium tetraurelia*. Identification and characterisation of a sarco(endo)plasmic reticulum-like Ca^{2+}-ATPase by phosphoenzyme intermediate formation and its inhibition by, 193
Calcium and synaptic plasticity (Invited review) 377
Calcium-ATPase, identification and characterisation of a sarco(endo)plasmic reticulum-like. Subplasmalemmal Ca-stores in *Paramecium tetraurelia*. 193
Calcium changes in osteoclasts, nuclear and cytosolic, stimulated with ATP and integrin-binding peptide, 213
Calcium channels, structure and function of neuronal, and their role in neurotransmitter release (Invited review) 307
Calcium concentration,
  measuring with fluorescent indicators: theoretical approach to the ratio method 17
  myoplasmic free, and force of contraction in mouse skeletal muscle, effects of ryanodine receptor agonist 4-chloro-*m*-cresol on, 105
Calcium current, Ca^{2+}-activated Cl^- current and Ca^{2+} transients in sensory neurones, temperature dependencies of, 35
Calcium dysregulation in neuronal aging and Alzheimer's disease: history and new directions (Invited review) 417
Calcium entry in CHO cells, after Ca^{2+} stores depletion, is mediated by arachindonic acid 293
Calcium gradients, a role for local, upon hypoxic injury in human umbilical vein endothelial cells (HUVEC) 49
Calcium imaging, two dye two wavelength excitation: results from bovine adrenal chromaffin cells, 71
Calcium in cambium and phloem but not in xylem cells, cambium pre-activation in beech correlates with a strong temporary increase of, 205
Calcium in health and disease (Meeting report), 233
Calcium influx through the plasma membrane, leukotriene D_4 induces a rapid increase in cAMP in the human epithelial cell line, Int 407: a potential role for this signal in the regulation of, 9
Calcium measurement (neuronal free) using BTC/AM, a low affinity calcium indicator, 165
Calcium mobilisation
  biochemical mechanisms of, induced by mastoparan and chimeric hormone-mastoparan constructs, 27
  in human U373 MG astrocytoma cells, determination of the inositol (1,4,5) trisphosphate requirement for histamine- and substance P-induced, 59
Calcium permeability of ligand-gated channels (Invited review) 325
Calcium pump (plasma membrane) in megakaryoblastoid cells, expression of hPMCA4b (the major form) is greatly reduced in mature human platelets, 129
Calcium release
  and sequestration in eggs of *Chaetopterus pergamentaceus*, mechanisms of, 285
  (sarcoplasmic reticulum) and Na^+-Ca^{2+} exchange mediates Ca^{2+} cycling in vascular smooth muscle, functional linkage of, 275
Calcium sensors in regulated exocytosis (Invited review), 367
Calcium signaling
  and luteinizing hormone secretion in pituitary gonadotrophs, dual action of androgen on, 223
  intracellular, in the nervous system (Special Issue), 305–434
  in epithelial cells, use of replication deficient adenoviruses to investigate the role of G proteins in, 97
  in glial cells (Invited review) 405
  local, in neurons (Invited review) 359
  through nucleotide receptor P_{2Y2} in cultured human vascular endothelium, 117
Calcium stores
  and capacitative Ca^{2+} entry in HeLa cells, role of calreticulin in regulating intracellular, 253
  depletion (after), Ca^{2+} entry in CHO cells is mediated by arachindonic acid 293
  neuronal (Invited review) 333
  subplasmalemmal, in *Paramecium tetraurelia*. Identification and characterisation of a sarco(endo)plasmic reticulum-like Ca^{2+}-ATPase by phosphoenzyme intermediate formation and its inhibition by caffeine 193
Calcium transients (intracellular) of isolated adult heart cells labelled with fura-2 by acetoxymethyl ester loading, calibration of, 263
Calcium wave speeds, on the conservation of (Review), 1

Calibration of intracellular Ca transients of isolated adult heart cells labelled with fura-2 by acetoxymethyl ester loading, 263
Calreticulin, role of, in regulating intracellular Ca^{2+} storage and capacitative Ca^{2+} entry in HeLa cells, 253
Cambium pre-activation in beech correlates with a strong temporary increase of calcium in cambium and phloem but not in xylem cells 205
cAMP in the human epithelial cell line Int 407, leukotriene D_4 induces a rapid increase in: a potential role for this signal in the regulation of calcium influx through the plasma membrane, 9
Chaetopterus pergamentaceus, mechanisms of calcium release and sequestration in eggs of, 285
Channels ($InsP_3$-receptor), nuclear calcium release by, plays a role in meiosis reinitiation in the mouse oocyte, 239
Channels (ligand-gated), calcium permeability of (Invited review), 325
Channels TRPL *(Drosophila)*, activation of heterologously expressed: Ca^{2+} is not required and InsP, is not sufficient, 153
Cl^- current (Ca^{2+}-activated), Ca^{2+} current and Ca^{2+} transients in sensory neurones, temperature dependencies of, 35
Cytosolic and nuclear calcium changes in osteoclasts stimulated with ATP and integrin-binding peptide, 213

D

Desmin and GFAP assemblies into intermediate filaments, annexin VI binds S100A1 and S100B and blocks the ability of S100A1 and S100B to inhibit, 177
Dimerization: hydrophobic residues in the C-terminal region of S100A1 are essential for target protein binding but not for dimerization, 137
Drosophila TRPL channels: Ca^{2+} is not required and $InsP_3$ is not sufficient for activation of heterologously expressed, 153
Dual action of androgen on calcium signaling and luteinizing hormone secretion in pituitary gonadotrophs, 223

E

Effects of ryanodine receptor agonist 4-chloro-*m*-cresol on myoplasmic free Ca^{2+} concentration and force of contraction in mouse skeletal muscle 105
Endoplasmic reticulum, functional measurements of $[Ca^{2+}]$ in the, using a herpes virus to deliver targeted aequorin, 87
Epithelial (human) cell line Int407, leukotriene D_4 induces a rapid increase in cAMP: a potential role for this signal in the regulation of calcium influx through the plasma membrane, 9
Erratum 85
Exocytosis (regulated), calcium sensors in (Invited review), 367
Expression of hPMCA4b, the major form of the plasma membrane calcium pump in megakaryoblastoid cells is greatly reduced in mature human platelets, 129

F

Fluorescent indicators, measuring $[Ca^{2+}]$ with: theoretical approach to the ratio method 17
Functional linkage of Na^+-Ca^{2+} exchange and sarcoplasmic reticulum Ca^{2+} release mediates Ca^{2+} cycling in vascular smooth muscle 275
Functional measurements of $[Ca^{2+}]$ in the endoplasmic reticulum using a herpes virus to deliver targeted aequorin, 87
Fura-2 by acetoxymethyl ester loading, calibration of intracellular Ca transients of isolated adult heart cells labelled with, 263

G

G proteins in Ca^{2+} signalling in epithelial cells, use of replication deficient adenoviruses to investigate the role of, 97
GFAP and desmin assemblies into intermediate filaments, annexin VI binds S100A1 and S100B and blocks the ability of S100A1 and S100B to inhibit, 177
Glial cells, calcium signalling in (Invited review), 405

H

Heart cells (isolated adult), calibration of intracellular Ca transients of labelled with fura-2 by acetoxymethyl ester loading, 263
HeLa cells, role of calreticulin in regulating intracellular Ca^{2+} storage and capacitative Ca^{2+} entry in, 253
Herpes virus to deliver targeted aequorin, functional measurements of $[Ca^{2+}]$ in the endoplasmic reticulum using a, 87
Histamine- and substance P-induced Ca^{2+} mobilisation in human U373 MG astrocytoma cells, determination of the inositol (1,4,5) trisphosphate requirement for, 59
Hydrophobic residues in the C-terminal region of S100A1 are essential for target protein binding but not for dimerization, 137
Hypoxic injury in human umbilical vein endothelial cells (HUVEC), a role for local calcium gradients upon, 49

I

Inositol (1,4,5) trisphosphate requirement for histamine- and substance P-induced Ca^{2+} mobilisation in human U373 MG astrocytoma cells, determination of the, 59
InsP, is not sufficient and Ca^{2+} is not required: activation of heterologously expressed *Drosophila* TRPL channels, 153
$InsP_3$-receptor channels, nuclear calcium release by, plays a role in meiosis reinitiation in the mouse oocyte, 239
Integrin-binding peptide and ATP, nuclear and cytosolic calcium changes in osteoclasts stimulated with, 213
Intracellular calcium signalling in the nervous system (Special Issue), 305–434

L

Leukotriene D_4 induces a rapid increase in cAMP in the human epithelial cell line, Int 407: a potential role for this signal in the regulation of calcium influx through the plasma membrane, 9
Ligand-gated channels, calcium permeability of (Invited review), 325
Linear approximations to the understanding of Ca^{2+}, usefulness and limitations of (Invited review), 345
Local Ca^{2+} signaling in neurons (Invited review) 359
Luteinizing hormone secretion and calcium signaling in pituitary gonadotrophs, dual action of androgen on, 223

M

Mastoparan and chimeric hormone-mastoparan constructs, biochemical mechanisms of calcium mobilisation induced by, 27
Measuring $[Ca^{2+}]$ with fluorescent indicators: theoretical approach to the ratio method 17

© Harcourt Brace & Co. Ltd 1998

Mechanisms of calcium release and sequestration in eggs of *Chaetopterus pergamentaceus* 285
Megakaryoblastoid cells,in, expression of hPMCA4b (the major form of the plasma membrane calcium pump) is greatly reduced in mature human platelets, 129
Meiosis reinitiation in the mouse oocyte, nuclear calcium release by $InsP_3$-receptor channels plays a role in, 239

N

Na^+-Ca^{2+} exchange and sarcoplasmic reticulum Ca^{2+} release mediates Ca^{2+} cycling in vascular smooth muscle, functional linkage of, 275
Nervous system, intracellular calcium signalling in the (Special Issue), 305–434
Neuronal aging, calcium dysregulation in, and Alzheimer's disease: history and new directions (Invited review) 417
Neuronal Ca^{2+} channels, structure and function of, and their role in neurotransmitter release (Invited review) 307
Neuronal calcium stores (Invited review) 333
Neuronal cells, apoptosis and cell death in: where does Ca^{2+} fit in? (Invited review), 387
Neuronal free calcium measurement using BTC/AM, a low affinity calcium indicator, 165
Neurones (sensory), temperature dependencies of Ca^{2+} current, Ca^{2+}-activated Cl^- current and Ca^{2+} transients in, 35
Neurones, local Ca^{2+} signaling in (Invited review) 359
Neurotransmitter release, structure and function of neuronal Ca^{2+} channels and their role in (Invited review) 307
Nuclear and cytosolic calcium changes in osteoclasts stimulated with ATP and integrin-binding peptide, 213
Nuclear calcium release by $InsP_3$-receptor channels plays a role in meiosis reinitiation in the mouse oocyte, 239
Nucleotide receptor P_{2Y2}, calcium signalling through, in cultured human vascular endothelium, 117

O

Oocyte (mouse), nuclear calcium release by $InsP_3$-receptor channels plays a role in meiosis reinitiation in the, 239
Osteoclasts, nuclear and cytosolic calcium changes in, stimulated with ATP and integrin-binding peptide, 213

P

Paramecium tetraurelia, subplasmalemmal Ca-stores in. Identification and characterisation of a sarco(endo)plasmic reticulum-like Ca^{2+}-ATPase by phosphoenzyme intermediate formation and its inhibition by caffeine 193
Pituitary gonadotrophs, dual action of androgen on calcium signaling and luteinizing hormone secretion in, 223
Platelets (mature human), expression of hPMCA4b is greatly reduced in, 129
Protein binding (target) but not for dimerization, hydrophobic residues in the C-terminal region of S100A1 are essential for, 137

R

Ratio method, theoretical approach to the: measuring $[Ca^{2+}]$ with fluorescent indicators: 17
Role for local calcium gradients upon hypoxic injury in human umbilical vein endothelial cells (HUVEC) 49
Role of calreticulin in regulating intracellular Ca^{2+} storage and capacitative Ca^{2+} entry in HeLa cells, 253
Ryanodine receptor agonist 4-chloro-*m*-cresol, effects of, on myoplasmic free Ca^{2+} concentration and force of contraction in mouse skeletal muscle 105

S

S100A1 and S100B, annexin VI binds, and blocks the ability of S100A1 and S100B to inhibit desmin and GFAP assemblies into intermediate filaments 177
Skeletal (mouse) muscle, effects of ryanodine receptor agonist 4-chloro-*m*-cresol on myoplasmic free Ca^{2+} concentration and force of contraction in, 105
Structure and function of neuronal Ca^{2+} channels and their role in neurotransmitter release (Invited review) 307
Subplasmalemmal Ca-stores in *Paramecium tetraurelia*. Identification and characterisation of a sarco(endo)plasmic reticulum-like Ca^{2+}-ATPase by phosphoenzyme intermediate formation and its inhibition by caffeine 193
Substance P- and histamine-induced Ca^{2+} mobilisation in human U373 MG astrocytoma cells, determination of the inositol (1,4,5) trisphosphate requirement for, 59
Synaptic plasticity and Ca^{2+} (Invited review) 377

T

Target protein binding but not for dimerization, hydrophobic residues in the C-terminal region of S100A1 are essential for, 137
Temperature dependencies of Ca^{2+} current, Ca^{2+}-activated Cl^- current and Ca^{2+} transients in sensory neurones 35

U

Umbilical (human) vein endothelial cells (HUVEC), a role for local calcium gradients upon hypoxic injury in, 49
Use of replication deficient adenoviruses to investigate the role of G proteins in Ca^{2+} signalling in epithelial cells 97
Usefulness and limitations of linear approximations to the understanding of Ca^{2+} (Invited review), 345

V

Vascular endothelium (cultured human), calcium signalling through nucleotide receptor P_{2Y2} in, 117
Vascular smooth muscle, functional linkage of Na^+-Ca^{2+} exchange and sarcoplasmic reticulum Ca^{2+} release mediates Ca^{2+} cycling in, 275

W

Wave speeds, on the conservation of calcium (Review), 1
